### Experiment - 10.

Aim: To create a virtual Hard disk for the given virtual machine and allocate around 10GB of storage from the physical HOD.

Procedure:-

- Launch the VM using VM Ware workstation
- Under Customize hardware → Add storage types
- Select appropriate storage
- Finish the configuration
- Check to see if the additional hard disk is added in the VM.

Result: A virtual hard disk has been added inside the VM machine.

A photograph of a computer keyboard is positioned at the top of the page, showing the F1 through F5 keys at the top, along with other function keys like Esc, Tab, Caps Lock, Shift, Ctrl, and Fn.

Output	20GB
Memory	2
Processors	10GB
Hard disk	2 GB
CD/DVD	Auto detect
Network Adapter	NAT
USB controller	Present
Sound card	Auto detect
Printer	Present
Display	Auto detect
